

Requirements

Dependencies and Installation

The following packages and versions are the ones I have used to run the tool:

- Python **3.12.9**
- pandas == 2.2.3
- numpy == 2.2.4
- scikit-learn == 1.6.1

Installation Instructions

You can install all the dependencies using the following `pip` command:

```
pip install pandas==2.2.3 numpy==2.2.4 scikit-learn==1.6.1
```

Directory

- Ensure that the `datasets` folder is placed in the same directory as the python script `dal_l1.py`.
- No additional setup is required beyond installing the listed dependencies.
